# New York City Neighborhoods and Tree Species

A Principal Coordinates Analysis of NTAs and Species using Bray Dissimilarity on percent prevalence of species within NTAs.
The more yellow the tree species label, the more common that species is in the city as a whole.

Borough ● Bronx ● Brooklyn ● Manhattan ● Queens ● Staten Island

Data: 2015 Tree Census, NYC Open Data Initiative. Graph: Kieran Healy / @kjhealy. Made with R and ggplot.
